Distinct Advantages of SUITE8

It allows an easy and quick booking process, reduces the possibility of human error, and allows management of all customer profiles from a single center.

It gives a holistic and versatile perspective, taking the data collected in a single center on aspects such as customer relations, management of personnel and indoor facilities.

By means of its flexible structure, you can customize it to your needs. It is suitable for use in every size of accommodation facility.

It works integrately with more than 300 third party systems in total, including access control systems, POS systems, pay-to-watch TVs, internet access, and controls the charging of these.

It is suitable for management of personnel and the whole facility.

It presents reports that you can design to your needs.

For chain hotels, it shares the database, allowing guest profiles, bookings and vacancy to be seen by all the hotels in the chain.

It allows detailed management of indoor facilities and meeting and banquet events.

It has free of charge, special modules that you can monitor malfunctions in the hotel, and requests, complaints and surveys of customers.

It has the feature of calculating, defining and flexible invoicing of tour company commissions.
